

# Home Security Guidelines

-  Fit a sturdy deadlock on your door and put a shield on top of the lock. Bolt your door with a carabiner before sleep
-  Fit sturdy window grilles
-  Repair any broken windows or locks
-  Always lock up before going out
-  Do not keep excess cash or valuables at home
-  If there is a sudden blackout and water suspension in your building, call the caretaker, if any, or get someone to have a look with you. Don't leave your house unaccompanied
-  Ask your family or neighbours to clear your letter box while you are on holiday. Don't forget to lower your home phone's volume so there are no signs of absence
-  Stay vigilant against culprits who may act as workers of removal companies during renovations in your building

## Crimes commonly found in residential buildings:

House-breaking    Illegal imprisonment  
Drugs                Manipulation of prostitution....etc

These crimes are classified as public offences which means you can file police reports anonymously

If you think burglars are at work in your building, report it to the police immediately
